Other ways to support SOLIDARITY with SOUTH SUDAN

In this uncertain period, the advent of **Covid-19** pandemic is causing a domino effect on the economy. Currently, our projects in **South Sudan** are closed for safety, but, we are searching other ways to reach out our students.

Moreover, we need to support local population, who is vulnerable and unprotected and, last but not least, we have always the staff costs to be covered.

For this reason, we are forced to ask your financial support. [Link here](#) to read the special appeal from our Board and to understand how you can support us.
